

NOTE TO FILE PM 1474 DES

9/13/91

Design case is first for Beta Type article but not likely to be commercial product, therefore Charles recommended that this not be foreign filed, though Cliff Lilly had designated several countries for coverage. After reviewing with CEBG and JES, who both preferred no foreign filing, Jim consulted with K. Houghton and pointed out the difficulties of proceeding without a focus on which device we really would need to try and protect and the folly of filing on something which would provide little or no coverage as a design. Houghton approved withdrawing the recommendation and not foreign filing.
